Summary:

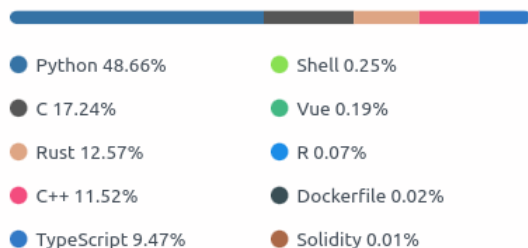

A Software Engineer focused on developing web3 applications. Obsessed with bringing blockchain technology to the mainstream.

Currently working in the Solana blockchain. Although, I do have experience in Ethereum, Polygon and EOSio smart contracts.

A Data Scientist passionate about Deep Learning. Currently working in the field building social media bots that use the latest Natural Language Processing (NLP) models to interact with your social accounts like a humanoid without being detected.

A Quant, trading global financial markets with algorithms for over 10 years. Specialized in High Frequency Trading (HTF) and Market Making (MM) systems. Currently working only in Financial Options trading models.

Experience:

Software Engineer

Beenzer dApp · Self-employed

Dec 2022 - Present · 3 mos

Geneva, Switzerland · Remote

Beenzer dApp is the first mobile application for iOS & Android built in the Solana blockchain. It combines the features of social media platforms like Instagram and TikTok with the benefits of non-fungible tokens (NFTs). By minting each post, users have the ownership of their content and can choose to print, burn, transfer, sell, or hold their Beenzer NFTs.
